

Trackable Assets

Our GPS trackers can be retrofitted into a range of assets for deployment in Covert operations

RedWeb Technologies GPS 'trackable assets' are continuing to prove themselves a valuable tool in the fight against organized crime.

“With a couple of clicks we could back track the unit's entire route leading us to the house of the thief and the location where the unit was sold (which is now the subject of another operation) In essence, we got the best possible result and I have no doubt that it is because we used the best possible kit”.

*Sgt Damian Ash,
Metropolitan Police Service Vehicle Crime Squad*

- Police approved trackers (ACPO CPI Secured by Design).
- Optimized operation and scheduled reports.
- Remains in deep-sleep mode all or most of the time.
- Only sends location reports according to a pre-defined schedule, this in turn optimizes operation times ensuring users get the most from each power charge.
- RF Intelligent Tags are fitted as standard to all Covert assets.

Trackable assets are ideal for police covert operations.

- Trackable Bikes
- Plasma TVs
- Satnavs
- Drills
- Laptops
- Playstations
- Xbox
- Computers

All can be fitted with radio frequency technology

Secured by Design
